

All Agency Project Request

2013 - 2015 Biennium

<u>Agency</u>	<u>Institution</u>	<u>Building No.</u>	<u>Building Name</u>
University of Wisconsin	Oshkosh	285-0F-0026	TITAN STADIUM

<u>Project No.</u>	<u>Project Title</u>
I5BIW	Titan Stadium Synthetic Turf Repl

Project Intent

This project provides investigation and research, pre-design, and design services to replace the synthetic turf field surface and repair the pole vault and long jump runways contained within the nine lane oval track. The athletic surfaces will be evaluated to identify deficiencies, develop design solution alternatives, and recommend appropriate corrective measures.

Project Description

Project work includes removal and disposal or salvage of ~105,370 SF of FieldTurf infield; sitework grading, repairs, and reconditioning as required to accept a new synthetic field surface; purchase and installation of a new synthetic field surface system with concussion pad; and application of all field markings for football and soccer. The new field surface will be comparable to other fields within the NCAA Division III conference. This project will also repair the bituminous pavement runways for the long jump and pole vault events.

Project Justification

The FieldTurf product was installed in 2003 and is at the end of its useful life. The turf cushion has dissipated significantly and has become a concern for athletic field safety. This upgrade will allow for better playability and reduce the potential of injury caused by a fall.

A/E Consultant Requirements

☒ A/E Selection Required?

Consultants should have specific expertise and experience in the design and coordination of competitive collegiate athletic surfaces, sport venues, track and field event areas, asphalt pavement systems, and turf management (natural and synthetic) as part of a design team. Work includes site surveys, acquiring field data, and verifying as-built conditions to assure accurate development of design and bidding documents and production of necessary design and bidding documents. Consultants should indicate specific projects from past experience (including size, cost, and completion date) in their letter of interest and when known, include proposed consulting partners and specialty consultants.

Commissioning

Project Scope Consideration Checklist

y N

- Will the building or area impacted by the project be occupied during construction? If yes, explain how the occupants will be accommodated during construction. ☒ ☐
All project work will be coordinated through campus physical plant staff to minimize disruptions to daily operations and activities.
- Is the project an extension of another authorized project? If so, provide the project #... ☐ ☒
- Are hazardous materials involved? If yes, what materials are involved and how will they be handled? ☐ ☒
Hazardous materials abatement is not anticipated on this project. Comprehensive building survey inventory data is not available on Wisconsin's Asbestos & Lead Management System (WALMS) <<http://walms.doa.state.wi.us/>>.
- Will the project impact the utility systems in the building and cause disruptions? If yes, to what extent? ☐ ☒
- Will the project impact the heating plant, primary electrical system, or utility capacities supplying the building? If yes, to what extent? ☐ ☒
- Are other projects or work occurring within this project's work area? If yes, provide the project # and/or description of the other work in the project scope. ☐ ☒
- Have you identified the WEPA designation of the project...Type I, Type II, or Type III? ☒ ☐
Type III.

All Agency Project Request

2013 - 2015 Biennium

-
8. Is the facility listed on a historic register (federal or state), or is the facility listed by the Wisconsin Historical Society as a building of potential historic significance? If yes, describe here. ☐ ☒
9. Are there any other issues affecting the cost or status of this project? ☐ ☒
10. Will the construction work be limited to a particular season or window of opportunity? If yes, explain the limitations and provide proposed solution. ☒ ☐
project work is seasonal. Preferred project work schedule should be limited to late spring, summer, and/or early fall months if possible.
11. Will the project improve, decrease, or increase the function and costs of facilities operational and maintenance budget and the work load? If yes, to what extent? ☐ ☒
12. Are there known code or health and safety concerns? If yes, identify and indicate if the correction or compliance measure was included in the budget estimate, or indicate plans for correcting the issue(s). ☐ ☒
13. Are there potential energy or water usages reduction grants, rebates, or incentives for which the project may qualify (i.e. Focus on Energy <<http://www.focusonenergy.com>> or the local utility provider)? If yes, describe here. ☐ ☒
14. If this is an energy project, indicate and describe the simple payback on state funding sources in years and the expected energy reduction here. ☐ ☒
